## Professional Summary

Frontend Developer with 5+ years of experience crafting high-performance, SEO-optimized web applications using React, Next.js, and TypeScript. Expert in translating complex Figma designs into pixel-perfect, responsive production code while implementing technical SEO best practices. Proven track record building scalable frontend systems serving 50,000+ users with consistent 90+ Lighthouse performance scores and top search rankings. Specialized in component architecture, state management, Core Web Vitals optimization, and semantic HTML implementation for maximum search visibility.

## Skills

**Soft skills:** Problem-Solving & Critical Thinking, Attention to Detail, Collaboration & Feedback Openness, Ownership & Accountability

**Technical skills:** React.js, Next.js, TypeScript, JavaScript (ES6+), TailwindCSS, Redux, Technical SEO, On-page Optimization, Git, Figma, Webpack, Google Search Console, Google Analytics, Responsive Design

## Work Experience

### Frontend Developer - Pixelgum

MAY, 2021 - PRESENT

- Translated 100+ Figma designs into pixel-perfect, responsive production code using React, Next.js, and TailwindCSS maintaining 98% design fidelity.
- Implemented comprehensive SEO best practices including semantic HTML5, proper heading hierarchy (H1-H6), descriptive alt text, and meta tag optimization across all projects.
- Built reusable component library serving 3+ million global merchants, reducing development time by 40% through standardized UI patterns.
- Optimized frontend performance and Core Web Vitals achieving consistent 90+ Lighthouse scores through code splitting, lazy loading, and asset optimization strategies.
- Collaborated with design and backend teams to implement seamless user experiences across web applications with complex state management.
- Implemented structured data (JSON-LD) and Open Graph tags improving social sharing and search result appearance.

### Shopify Frontend Developer - VoltaCharger

MAY, 2024 - PRESENT

- Customize Shopify themes using Liquid templating, HTML, CSS, and JavaScript for e-commerce brand serving 100+ countries.
- Implement SEO best practices including canonical URLs, structured data for products, and optimized meta tags improving organic search visibility by 40%.
- Develop responsive product pages, collection templates, and custom sections maintaining brand consistency.
- Optimize Core Web Vitals and page speed achieving 75+ mobile Lighthouse scores through image compression and lazy loading.
- Implement UI enhancements increasing mobile conversion rates by 25% through optimized layouts and micro-interactions.
- Collaborate with marketing team on promotional campaign designs and seasonal theme updates.

### Frontend Developer - Ethco Group Limited

AUGUST, 2022 - MAY, 2023

- Developed responsive landing pages and admin web application using Next.js, Ant Design, and modern CSS techniques.
- Converted Figma designs to production-ready code with full mobile responsiveness and cross-browser compatibility.
- Implemented Redux for complex state management across multi-page admin portal supporting 500+ users.
- Integrated Airtable API and Formspree for dynamic form handling, reducing manual data processing by 80%.
- Built data visualization components and interactive dashboards with real-time updates.

### Frontend Web Developer - Ayrem

MAY, 2020 - DECEMBER, 2021

- Converted 50+ page web application from Figma designs to production code using HTML, CSS, and vanilla JavaScript.
- Built flexible user and admin dashboards with responsive layouts and intuitive navigation patterns.
- Implemented frontend authentication flows, form validation, and error handling for seamless user experience.
- Consumed RESTful APIs with Axios implementing data fetching, caching strategies, and loading states.
- Contributed to frontend architecture decisions resulting in 5,000+ user acquisition in first month post-launch.

## Projects

**ApplyGigs**

2026

Next.js, TypeScript, TailwindCSS, Authentication

- Built comprehensive SaaS interface with multi-step forms, dashboard components, and data visualization using React and TailwindCSS.
- Developed resume builder with live preview, version control UI, and export functionality reducing user effort by 70%.
- Implemented authentication flows with protected routes, session management, and user state persistence.
- Created template-based cover letter generator with rich text editing and customization options.

**Landing Vault**

2025

Next.js, TypeScript, TailwindCSS, Firebase

- Engineered curated design inspiration platform featuring 100+ landing page examples with advanced search and filtering capabilities.
- Implemented dynamic content categorization system with smooth animations and transitions enhancing user experience.
- Optimized technical SEO with semantic HTML structure, meta descriptions, image alt attributes, and Open Graph protocol increasing organic traffic by 120%.
- Built responsive grid layouts with lazy loading, infinite scroll, and Next.js Image optimization achieving sub-2-second page loads and improved Core Web Vitals.
- Integrated newsletter subscription forms with client-side validation and real-time feedback.

**Pitch Deck Design**

2024

Next.js React Firebase Responsive Design

- Developed marketplace platform with image-heavy content requiring advanced optimization techniques.
- Implemented Firebase-powered image gallery with lazy loading, skeleton screens, and CDN integration improving performance by 40%.
- Built responsive carousel components, modal systems, and interactive pricing sections.
- Created blog section with markdown rendering, syntax highlighting, and SEO-optimized meta tags.

**Wordiebox**

2023

Next.js React Modular Architecture

- Developed 35+ individual tool interfaces with consistent design language using modular component architecture.
- Implemented complex UI patterns including text editors, random generators, and real-time character/word counting.
- Built responsive layouts optimizing for mobile text input and manipulation workflows.
- Created navigation system with categorization, search functionality, and breadcrumb trails for 35+ tools.

**PlanMyPool**

Next.js React TailwindCSS Image Processing

- Designed and implemented landing page with conversion-optimized layout achieving 350+ customer acquisitions.
- Built multi-step file upload interface with drag-and-drop, preview functionality, and progress indicators.
- Created image gallery component displaying 50+ AI-generated designs with comparison sliders and zoom capabilities.
- Implemented responsive pricing section, testimonial carousels, and FAQ accordion components.

**Maxim Infrastructure**

2022

HTML TailwindCSS JavaScript Animations

- Designed responsive landing page for financial data company with custom animations and interactive elements.
- Implemented smooth scroll effects, parallax sections, and form-to-email integration using Airtable.
- Optimized for mobile-first experience achieving 95+ Lighthouse performance score.
- Created reusable component patterns using utility-first CSS approach with TailwindCSS.

**Techtank Labs**

2022

React EmailJS Bootstrap Custom CSS

- Designed and developed multi-page website with consistent navigation, hero sections, and call-to-action patterns.
- Created responsive grid systems, card components, and service showcases using Bootstrap and custom CSS.
- Implemented contact forms with client-side validation and email integration using EmailJS.
- Built animated elements and transitions enhancing user engagement and brand experience.
